Volume IV of The Historical Harpsichord contains two monographs of major importance, Harpsichord Decoration: A Conspectus by Sheridan Germann, and A Fable Deconstructed: The 1770 Taskin at Yale by Richard Reppann. Sheridan Germann, an acclaimed scholar and practitioner in the field of harpsichord decoration, offers the first comprehensive illustrated conspectus of the subject. In Part I Ms. Germann tells us that the styles of the decoration of harpsichords (and spinets, virginals and clavichords) tended to follow contemporary furniture fashions, but usually lagged conservatively behind the prevailing fashions. Because, unlike most furniture, the instruments are often dated, they provide rare documentation of how long these styles remained in common use. This survey follows chronologically the five major regional traditions of keyboard instrument decoration-Italian, Flemish, French, German and English-but with emphasis on the international changes in taste on which each region produced its own variations. In Part II,

Richard Reppann of the Yale Musical Instrument Collection describes his research into the uniquely experimental construction of the 1770 Pascal Taskin harpsichord. This essay forms a pendant to William Dowd's in Vol. I that treats the surviving instruments of the Blanchet-Taskin workshop up to 1770. The romantic provenance of the 1770 Taskin, concocted by the antique trade to enhance the instrument's market value, is revealed as a fable. From a pre-departure checklist to an equipment ID record, from the winter decommissioning to the spring fitting out, this title covers what a boat owner needs to have for a shipshape vessel and a good journey. It also features sections, including a Float Plan List, Tool Kit List, GPS Waypoints pages and Trip Index. "Both powerboaters and sailboaters will find within the pages of Chapman's the crucial information they need to participate safely in their sport, whether as weekend sailors or seasoned voyagers. Chapman's includes all the most recent advances in boating, including in-depth information on navigation using satellite technology, recommended procedures in emergency situations, as well as all of the current laws and regulations governing the nation's waterways. From the high stakes poker table in the Hôtel de Rêve Noire, to the deadly Forest Of Souls, to a cave where he must trap a sixty-five thousand year old demon, Jack flows in and out of this world. Even when his own dream duplicate hires him to kill himself, Jack is mercury in motion—Jack the Nimble, Jack the Quick—until he runs out of tricks and must face his greatest fear. Why does a piano sound like a piano? A similar question can be asked of virtually all musical instruments. A particular note--such as middle C--can be produced by a piano, a violin, a clarinet, and many other instruments, yet it is easy for even a musically untrained listener to distinguish between these different instruments. A central quest in the study of musical instruments is to understand why the sound of the "same" note depends greatly on the instrument, and to elucidate which aspects of an instrument are most critical in producing the musical tones characteristic of the instrument. The primary goal of this book is to investigate these questions for the piano. The explanations in this book use a minimum of mathematics, and are intended for anyone who is interested in music and musical instruments. At the same time, there are many insights relating physics and the piano that will likely be interesting and perhaps surprising for many physicists.
