**Secret Remains** Jul 15 2022 A cold case murder, a grisly discovery, and a viper's nest of resentment, betrayal, and dirty secrets converge in this mystery perfect for fans of Kathy Reichs and Jayne Ann Krentz. It's been 12 years since Sandi Parkman went missing after being dropped off at home by her schoolmate, Nick Larson, now the Sheriff of Freeport, Michigan. When a construction crew unearths Sandi's bones--along with Nick's letterman jacket and one of his hairs--Nick becomes suspect number one in the murder. Dr. Emily Hartford, the daughter of Freeport's medical examiner, is called in to investigate, but the case is about to get personal. Nick was Emily's high school love, and now she has to either clear his name--or contend that he's the killer. As she delves into the case, a host of other suspects emerge: a coterie of Nick's jock friends from high school; Sandi's sister, Tiffany, now a dancer at a local strip club; and James VanDerMuellen, a trust funder who's recently returned to Freeport. As the autumn skies darken over Freeport and the holiday season looms, Emily must sift through more than Sandi's brittle bones to solve the case. Can she exonerate Nick--and rekindle their long-smoldering romance? The race is on to find the truth.

Supplement, 1879-1888 with annotations and general index to both volumes Jul 03 2021

**The Christopher Killer** Feb 27 2021 As the daughter of a Colorado County coroner, seventeen-year-old Cameryn Mahoney is no stranger to death. In fact, she's always been fascinated by the science of it. So she's thrilled to finally get some hands-on experience in forensics working as her father's assistant. But Cammie is in for more than she bargained for when the second case that she attends turns out to be someone she knows—the latest victim of a serial killer known as the Christopher Killer. And if dealing with that isn't hard enough, Cammie soon realizes that if she's not careful, she might wind up as the killer's next victim. . . .

**Medicolegal Death Investigation System** Feb 22 2023 The US Department of Justice's National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of The National Academies to conduct a workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the Workshop presentations and discussions that followed them.

*Strengthening Forensic Science in the United States* Dec 28 2020 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**The Coroner's Daughter: A Novel** Sep 05 2021 When a young woman uncovers evidence that a recent suicide may have been murder, her investigations attract the attention of a dangerous man stalking the streets of nineteenth-century Dublin. Dublin, 1816. A young nursemaid conceals a pregnancy and then murders her newborn in the home of the Neshams, a prominent family in a radical Christian sect known as the Brethren. Rumors swirl about the identity of the child's father, but before an inquest can be held, the maid is found dead after an apparent suicide. When Abigail Lawless, the eighteen-year-old daughter of the city coroner, by chance discovers a message from the maid's seducer, she sets out to discover the truth. An only child, Abigail has been raised amid the books and instruments of her father's grim profession, and he in turn indulges her curious and critical mind. Now she must push against the restrictions society places on a girl her age to pursue an increasingly dangerous investigation. Abigail's searches begin to uncover the well-guarded secrets of two factions—the Christian Brethren and a burgeoning rationalist community—drawing the attention of a sinister figure who emerges in fleeting glimpses and second-hand reports: the man with the lazy eye. Determined, resourceful, and intuitive, Abigail Lawless emerges as a young lady sleuth operating at the dawn of forensic science.

**Côte D'Ivoire** Nov 14 2019 This document is the result of a field study conducted by a multidisciplinary group of men and women whose common point is the profound engagement to Côte d'Ivoire, the requirement for objectivity and the commitment to justice. This group is called "Group of Patriotic Investigators." The collective work of this group has been made under the supervision of Bi Gaha Loukou, Tata Kôkôtrè and Océane Siloué. The nature of the facts observed and reported in this paper on the Ivorian political landscape has often required the investigators to get into the skin of the leaders, officials, members, and supporters of the Ivorian Popular Front (FPI) in particular, but also of the citizens supposedly close to ex-President Laurent Gbagbo in general. Those are the expiatory victims of a policy of ethnic cleansing. The main actors of this landscape are the National Congress of the Resistance and Democracy (CNRD) and the Ivorian Popular Front (FPI) on one hand, and the Rally of Houphouëtists for Democracy and Peace (RHDP including the RDR and PDCI as main actors) on the other.

*The Report of the Hillsborough Independent Panel* Dec 08 2021 96 women, men and children died as a result of the disaster in Hillsborough Stadium on 15 April 1989. They were crushed due to overcrowding in the Leppings Lane terrace, penned in by the ground's fencing. Hundreds more were injured and thousands traumatised. Lord Justice Taylor led a judicial inquiry (1990, Cm. 962, ISBN 9780101096225), concluding that the main cause of the disaster was the failure of police control. The next 11 years saw a variety of investigations and proceedings, including a scrutiny of new evidence (Lord Justice Stuart-Smith, 1998, Cm. 3878, ISBN 9780101387828). Yet many bereaved families felt that the true context, circumstances and aftermath had not been adequately made public, and were particularly aggrieved that it had become widely assumed that Liverpool fans' behaviour had contributed to the disaster. The Independent Panel was established in 2010 to oversee full public disclosure of all documents relating to the disaster and to report on its work. This report is in three parts. Firstly it shows what was already known and in the public domain by 2010. Secondly, in 12 detailed chapters, it describes what the disclosed documents add to public understanding. The third part gives a review of options for providing an archive of the documents. The disclosed documents (available at <http://panel.hillsborough.independent.gov.uk/>) add considerably to public understanding. They show that multiple factors were responsible for the tragedy and that the fans were not the cause. The report also shows that the bereaved families met a series of obstacles in their search for justice over more than 20 years.

**Estimation of the Time Since Death** Aug 16 2022 Estimation of the Time Since Death remains the foremost authoritative book on scientifically calculating the estimated time of death postmortem. Building on the success of previous editions which covered the early postmortem period, this new edition also covers the later postmortem period including putrefactive changes, entomology, and postmortem r

**Forensic Medicine and Death Investigation in Medieval England** Nov 07 2021 England has traditionally been understood as a latecomer to the use of forensic medicine in death investigation, lagging nearly two-hundred years behind other European authorities. Using the coroner's inquest as a lens, this book hopes to offer a fresh perspective on the process of death investigation in medieval England. The central premise of this book is that medical practitioners did participate in death investigation – although not in every inquest, or even most, and not necessarily in those investigations where we today would deem their advice most pertinent. The medieval relationship with death and disease, in particular, shaped coroners' and their jurors' understanding of the inquest's medical needs and led them to conclusions that can only be understood in context of the medieval world's holistic approach to health and medicine. Moreover, while the English resisted Southern Europe's penchant for autopsies, at times their findings reveal a solid understanding of internal medicine. By studying cause of death in the coroners' reports, this study sheds new light on subjects such as abortion by assault, bubonic plague, cruentation, epilepsy, insanity, senescence, and unnatural death.

*The Coroner* Aug 04 2021 Now a major television series on All4 and CBC, The Coroner is the first gripping installment in Matthew Hall's twice CWA Gold Dagger nominated Coroner Jenny Cooper series. Death is her living . . .

When lawyer Jenny Cooper is appointed Severn Vale District Coroner, she's hoping for a quiet life and space to recover from a traumatic divorce, but the office she inherits from the recently deceased Harry Marshall contains neglected files hiding dark secrets and a trail of buried evidence. Could the tragic death in custody of a young boy be linked to the apparent suicide of a teenage prostitute and the fate of Marshall himself? Jenny's curiosity is aroused. Why was Marshall behaving so strangely before he died? What injustice was he planning to uncover? And what caused his abrupt change of heart? In the face of powerful and sinister forces determined to keep both the truth hidden and the troublesome coroner in check, Jenny embarks on a lonely and dangerous one-woman crusade for justice which threatens not only her career but also her sanity. The Coroner is followed by the second book in the Coroner Jenny Cooper series, The Disappeared. The Jenny Cooper novels have been adapted into a hit TV series, Coroner, made for All4, CBC and NBC Universal starring Serinda Swan and Roger Cross.

**A Concise, Practical Abridgment of the Common and Statute Law, as at Present Administered in the Common-law, Probate, Divorce, and Admiralty Courts** Jun 21 2020

**The Cadaver King and the Country Dentist** Mar 19 2020 A shocking and deeply reported account of the persistent plague of institutional racism and junk forensic science in our criminal justice system, and its devastating effect on innocent lives After two three-year-old girls were raped and murdered in rural Mississippi, law enforcement pursued and convicted two innocent men: Kennedy Brewer and Levon Brooks. Together they spent a combined thirty years in prison before finally being exonerated in 2008. Meanwhile, the real killer remained free. The Cadaver King and the Country Dentist recounts the story of how the criminal justice system allowed this to happen, and of how two men, Dr. Steven Hayne and Dr. Michael West, built successful careers on the back of that structure. For nearly two decades, Hayne, a medical examiner, performed the vast majority of Mississippi's autopsies, while his friend Dr. West, a local dentist, pitched himself as a forensic jack-of-all-trades. Together they became the go-to experts for prosecutors and helped put countless Mississippians in prison. But then some of those convictions began to fall apart. Here, Radley Balko and Tucker Carrington tell the haunting story of how the courts and Mississippi's death investigation system -- a relic of the Jim Crow era -- failed to deliver justice for its citizens. The authors argue that bad forensics, structural racism, and institutional failures are at fault, raising sobering questions about our ability and willingness to address these crucial issues.

**The Education of a Coroner** Jan 09 2022 In the vein of Dr. Judy Melinek's Working Stiff, an account of the hair-raising and heartbreaking cases handled by the coroner of Marin County, California throughout his four decades on the

job—from high-profile deaths to serial killers, to Golden Gate Bridge suicides. Marin County, California is a study in contradictions. Its natural beauty attracts thousands of visitors every year, yet the county also is home to San Quentin Prison, one of the oldest and largest penitentiaries in the country. Marin ranks in the top one percent of counties nationwide in terms of affluence and overall health, yet it is far above the norm in drug overdoses and alcoholism, and comprises a large percentage of suicides from the Golden Gate Bridge. Ken Holmes worked in the Marin County Coroner's Office for thirty-six years, starting as a death investigator and ending as the three-term, elected coroner. As he grew into the job—which is different from what is depicted on television—Holmes learned a variety of skills, from finding hidden clues at death scenes, interviewing witnesses effectively, managing bystanders and reporters, preparing testimony for court to notifying families of a death with sensitivity and compassion. He also learned about different kinds of firearms, all types of drugs—prescription and illegal—and about certain unexpected and potentially fatal phenomena such as autoeroticism. Complete with poignant anecdotes, *The Education of a Coroner* provides a firsthand and fascinating glimpse into the daily life of a public servant whose work is dark and mysterious yet necessary for society to function.
