2021 a system process refers to how you deliver your
product or service to an audience whereas the business
process involves the how of your daily routine the system
process is more of the what a system process is the way
you offer whatever your product is to an audience so it s
not a thing necessarily but the structure for web jan 4 2022
content is simply the what of things and process is the how
of things it s often easier to come up with a what than it is
to come up with a how as you ll learn in this article the
latter is more important than the former we usually talk
about the content and process distinction in the context of
therapy web dec 15 2021 in general work processes show
the big picture and involve people from different
departments and roles as a rule a work process covers a
much longer period than procedures or work instructions
this is because it requires multiple procedures and many
work instructions to detail every task performed by many
actors to accomplish a
