Designing a fair, effective and acceptable regime that will reconcile public interest and the public's need for an uninterrupted flow of essential services on the one hand, while maintaining the freedom of collective bargaining on the other, is an ever more difficult public policy challenge. This book, the first detailed comparative analysis of existing legal and practical approaches across a spectrum of key national jurisdictions, provides a structured and insightful overview of the law and practice of regulating strikes in essential services. As such it can be of great value for public policy debate and the enhancement of national law in the field. The editors have assembled experts from fourteen countries who describe and analyse their respective country's experience with strikes in essential services and the legislative and judicial as well as informal approaches towards regulating and intervening in such strikes. Departing from legal theory with systematic comparative 'law in action' research, the contributors offer

innumerable valuable insights into a broad array of issues and topics as the following: - mechanisms aiming at compensating employees for encroaching on their collective bargaining rights; - public accountability and responsible management of public finance; - role of international conventions; - effects of globalization and advances in technology; - privatization, outsourcing and the decline of unions and workers' solidarity; - growing popular intolerance towards strikes in essential services; - effect of human rights-related court decisions; - convergence and divergence among contemporary legal regimes in defining and approaching strikes in essential services; - dispute process design and dispute resolution processes (mediation, conciliation and arbitration); and - substantive and procedural restrictions on the right to organize, bargain collectively and strike. The country reports are preceded by a detailed analysis of the inherent normative policy dilemma and a conceptual framework for designing and evaluating models of regulation. The concluding chapter presents a comparative overview of the insights gained. With its comparative perspective on one of the most sensitive areas of industrial relations and labour law, and its contextually relevant options for strategic choice and public policy debate, this incomparable volume will be welcomed by labour lawyers, legislators, policy makers, judicial bodies and researchers in the field of collective labour relations and fundamental human rights of workers on the national as well as international level. In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche. Intelligent agent and distributed AI (DAI) approaches attach specific conditions to cooperative exchanges between intelligent systems, that go far beyond simple functional interoperability. Ideally, systems that pursue local or global goals, coordinate their actions, share knowledge, and resolve conflicts during their interactions within groups of similar or dissimilar agents can be viewed as cooperative coarse-grained systems. The infrastructure of telecommunications is a world in transition. There are a number of trends that contribute to this: convergence of traditional telephony and data network worlds, blurring of boundaries between public and private networks, complementary evolution of wireline, wireless, and

cable network infrastructures, the emergence of integrated broadband multimedia networks and, of course, the information superhighway. Up to now, despite the effort that has gone into this area, the field of intelligent agents research has not yet led to many fielded systems. Telecommunications applications pose strong requirements to agents such as: reliability, real-time performance, openness, security management and other integrated management, and mobility. In order to fulfil their promise, intelligent agents need to be fully dependable and typically require an integrated set of capabilities. This is the challenge that exists for intelligent agents technology in this application domain. The EU has limited legislative competence in the field of social law. However, the Member States are increasingly modernizing social services and social (welfare) protection, attempting to make social services more efficient by increasingly looking to the market for the provision of such services. This policy move brings social services into the radar of EU law. The EU response to this sensitive issue has resulted in a piecemeal and fragmented approach towards the treatment of a new policy area of Social Services of General Interest (SSGI) in EU law and policy. This book is a first contribution towards charting how SSGI have emerged as a special category of SGI in the EU, the reaction of the Member States and stake-holders and how policy is being made through new governance processes, carve-outs and safe havens in legislation and soft law, especially in the light of the new values of the EU introduced by the Treaty of Lisbon 2009. It takes an inter-disciplinary approach and will be of interest to lawyers, economists and political scientists who are interested in EU policy-making as well as practitioners, EU and national policy-makers. In the 21st century, new kinds of challenges resulting from interdependence among states and globalization have had a determining impact on the conduct of diplomacy. Diplomacy has become multifaceted, pluri-directional, volatile and intensive, due to the increased complexity in terms of actors, dialogue subjects, modes of communication, and plurality of objectives. This unique text, written by a leading scholar and Foreign Service expert, examines all such factors to provide the definitive guide to diplomacy as it is practiced today. With a multitude of examples from around the world, including the US, UK, EU, Africa, Asia, and Latin America, the book covers the spectrum of diplomacy practice, including regional diplomacy, diplomacy of small states, performance management, handling of decisions and crisis, use of information technology, and reform in foreign ministries. Also included are chapters on craft skills and practical exercises. 21st Century Diplomacy will be essential to anyone learning diplomacy, and will also support courses in international relations, foreign policy, and intercultural communication. This publication examines how the Public Employment Service can actively promote and manage transitions out of unemployment into market work, both directly and via labour market programmes in Greece, Ireland, and Portugal. Mobile working and remote working from home or a small office, using phone, PC, fax and narrowband Internet is a rapidly increasing practice. The many well-documented benefits of working this way include higher productivity, more time spent with the family and local community and less time wasted commuting. At a community level they include benefits to the environment through substituting physical transport by telecommunications, and re-vitalisation of rural communities. Yet, people who work mainly this way face severe problems: a loss of contact with the office grapevine, the out of sight, out of mind syndrome, and exclusion from vital ad-hoc meetings and tutorials. Another major problem is slow speed of communication. This volume summarizes how technologies can revolutionise flexible working practices and go a long way towards solving the isolation problems of flexible workers. The 1998 Belfast Agreement promised to release citizens of Northern Ireland from the grip of paramilitarism. However, almost a decade later, Loyalist paramilitaries were still on the battlefield. After the Peace examines the delayed business of Loyalist demilitarization and explains why it included more fits than starts in the decade since formal peace and how Loyalist paramilitary recalcitrance has affected everyday Loyalists. Drawing on interviews with current and former Loyalist paramilitary men, community workers, and government officials, Carolyn Gallaher charts the trenchant divisions that emerged during the run-up to peace and thwart demilitarization today. After the Peace demonstrates that some Loyalist paramilitary men want to rebuild their communities and join the political process. They pledge a break with violence and the criminality that sustained their struggle. Others vow not to surrender and refuse to set aside their guns. These units operate under a Loyalist banner but increasingly resemble criminal fiefdoms. In the wake of this internecine power struggle, demilitarization has all but stalled. Gallaher documents the battle for the heart of Loyalism in varied settings, from the attempt to define Ulster Scots as a language to deadly feuds between UVF, UDA, and LVF contingents. After the Peace brings the story of Loyalist paramilitaries up to date and sheds light on the residual violence that persists in the post-agreement era. index. Voluntary organizations have moved from the margins to the centre of policy discussions in Canada, and citizens and politicians now view them in a new way. Rachel Laforest shows how members of voluntary organizations have struggled for a stronger voice in policy making and redefined their relationship to the federal government through key collaborations. This vivid account of how a loose coalition of organizations was transformed into a distinct sector offers a new conceptual framework for explaining dynamic state-voluntary sector relations at all levels of government.
