This slim volume is one of a number of excellent guides published as part of Oxford's "Pocket Guide to Social Work Research Methods" series. Compact but comprehensive, it provides a thorough introduction to one of the fastest-growing genres of research in the social work field today: secondary data analysis. After an all-too-brief summary of what constitutes this genre and a balanced analysis of its advantages and disadvantages, Vartanian (Bryn Mawr) provides guidelines for those considering the feasibility and appropriateness of using secondary data in their work. He then offers extensive summaries of 29 of the most commonly used secondary data sets. For all of the data sets, he provides a full and complete description, including key characteristics and where and how to access them. He also provides, most valuably, citations to examples of how researchers have recently used them in their empirical work. Rather redundantly, a similar package of information appears in appendixes at the end of the book. This is an admirable contribution whose only detractions are the rather random and poorly identified screenshots and other "pictures" interspersed throughout the text. Those seriously considering using secondary data analysis in their research should find this book immensely beneficial. Summing Up: Highly recommended. Graduate students and faculty/researchers. Graduate Students; Researchers/Faculty. Reviewed by J. C. Altman. DASH (Dietary Approach to Stop Hypertension) merupakan suatu pendekatan diet dalam pencegahan hipertensi yang mana diet dilakukan dengan mengkonsumsi makanan yang rendah garam dan

rendah lemak. DASH merupakan sebuah upaya penanganan yang efektif pada penderita hipertensi terutama dalam hal memodifikasi faktor penyebab yang dapat diubah atau modifiable risk factor. Buku ini berisi dari 5 (lima) bab di antaranya membahas mengenai Konsep Hipertensi, DASH (Dietary Approach to Stop Hypertension), dan DASH sebagai Upaya Penurunan Tekanan Darah Pasien Hipertensi. Tailored for upper-level undergraduate and MBA students, Assael's Consumer Behavior applies behavioral concepts to market strategy (domestic and international) with special emphasis on web-related issues and applications. Assael presents the content from a managerial perspective, focusing on decision making as the framework for understanding consumer behavior. The text also features a unique, three-chapter Marketing Action section, covering marketing communications, marketing segmentation and micromarketing, as well as consumer rights and social responsibility. This revised and updated Second Edition provides an introduction to the psychometric analysis and evaluation of rater-mediated assessments using many-facet Rasch measurement (MFRM). Essay rating data are used to illustrate the study of rater errors and biases and their implications for drawing reliable, valid, and fair inferences from assessment outcomes. Written specifically for teachers, *Motivating Students to Learn* offers a wealth of research-based principles on the subject of student motivation for use by classroom teachers. Now in its fourth edition, this book discusses specific classroom strategies by tying these principles to the realities of contemporary schools, curriculum goals, and classroom dynamics. The authors lay out effective extrinsic and intrinsic strategies to guide teachers in their day-to-day practice, provide guidelines for adapting to group and individual differences, and discuss ways to reach students who have become discouraged or disaffected learners. This edition features new material on the roles that classroom goal setting, developing students' interest, and teacher-student and peer relationships play in student motivation. It

has been reorganized to address six key questions that combine to explain why students may or may not be motivated to learn. By focusing more closely on the teacher as the motivator, this text presents a wide range of motivational methods to help students see value in the curriculum and lessons taught in the classroom. Written by one of the world's leading researchers and writers in the field, *Econometric Analysis of Panel Data* has become established as the leading textbook for postgraduate courses in panel data. This new edition reflects the rapid developments in the field covering the vast research that has been conducted on panel data since its initial publication. Featuring the most recent empirical examples from panel data literature, data sets are also provided as well as the programs to implement the estimation and testing procedures described in the book. These programs will be made available via an accompanying website which will also contain solutions to end of chapter exercises that will appear in the book. The text has been fully updated with new material on dynamic panel data models and recent results on non-linear panel models and in particular work on limited dependent variables panel data models. This volume is composed of peer-reviewed papers that have developed from the First Conference of the International Society for Non Parametric Statistics (ISNPS). This inaugural conference took place in Chalkidiki, Greece, June 15-19, 2012. It was organized with the co-sponsorship of the IMS, the ISI and other organizations. M.G. Akritas, S.N. Lahiri and D.N. Politis are the first executive committee members of ISNPS and the editors of this volume. ISNPS has a distinguished Advisory Committee that includes Professors R.Beran, P.Bickel, R. Carroll, D. Cook, P. Hall, R. Johnson, B. Lindsay, E. Parzen, P. Robinson, M. Rosenblatt, G. Roussas, T. SubbaRao and G. Wahba. The Charting Committee of ISNPS consists of more than 50 prominent researchers from all over the world. The chapters in this volume bring forth recent advances and trends in several areas of nonparametric statistics. In this way,

the volume facilitates the exchange of research ideas, promotes collaboration among researchers from all over the world and contributes to the further development of the field. The conference program included over 250 talks, including special invited talks, plenary talks and contributed talks on all areas of nonparametric statistics. Out of these talks, some of the most pertinent ones have been refereed and developed into chapters that share both research and developments in the field. Each chapter in Human Resource Development provides the reader with commentary, activities and review sections in an integrated approach. The action-oriented approach is vital for practicing managers but increasingly for postgraduate and final year undergraduates who have work experience. It is this aspect of the book that fills a gap that currently exists in the market. This text reflects organizational realities and balances and integrates the coverage of individuals, teams and organizational learning. The book is written in a straightforward manner and explains concepts and key issues in a lucid style. The activities are focused and are better suited to encouraging readers to learn.

This publication reviews the labour market integration of immigrants and their children in four OECD countries -- Belgium, France, The Netherlands and Portugal -- and provides country-specific recommendations. Buku Industri dan Organisasi yang ditulis oleh Seta A. Wicaksana, S.Psi., M.Psi., Psikolog, Aisyah Pia Asrunputri, B.A., M.M., dan Andita Putri Ramadhania ini menantang untuk dibaca. Industri merupakan kegiatan ekonomi untuk memproses masukan (mentah) menjadi produk yang

diperlukan pasar. Subjek yang menghasilkan produk itu mempunyai concerns agar produk yang dihasilkan berkualitas tinggi dengan efisiensi prosesnya yang tinggi pula. Meskipun buku ini tidak memberikan resep bagaimana seharusnya menghasilkan produk (barang atau jasa) yang berkualitas tinggi itu, tetapi isinya memberikan pemahaman tentang apa dan bagaimana unsur yang terlibat dalam produksi itu dapat berperan secara maksimal.

Regional autonomy in Indonesia; collection of articles. What drug provides Americans with the greatest pleasure and the greatest pain? The answer, hands down, is alcohol. The pain comes not only from drunk driving and lost lives but also addiction, family strife, crime, violence, poor health, and squandered human potential. Young and old, drinkers and abstainers alike, all are affected. Every American is paying for alcohol abuse. *Paying the Tab*, the first comprehensive analysis of this complex policy issue, calls for broadening our approach to curbing destructive drinking. Over the last few decades, efforts to reduce the societal costs--curbing youth drinking and cracking down on drunk driving--have been somewhat effective, but woefully incomplete. In fact, American policymakers have ignored the influence of the supply side of the equation. Beer and liquor are far cheaper and more readily available today than in the 1950s and 1960s. Philip Cook's well-researched and engaging account chronicles the history of our attempts to "legislate morality," the overlooked lessons from Prohibition, and the rise of Alcoholics Anonymous. He provides a thorough account of the scientific evidence that has accumulated over the last twenty-five years of economic and public-health research, which demonstrates that higher alcohol excise taxes and other supply restrictions are effective and underutilized policy tools that can cut abuse while preserving the pleasures of moderate consumption. *Paying the Tab* makes a powerful case for a policy course correction. Alcohol is too cheap, and it's costing all of us. ` John Arnold has written a book which will serve well any student or new practitioner in the area of

career management, both in terms of explaining how thinking has developed, and in looking forward to the complexities of the future' - Career Path, Institute Personnel and Development `This book has two purposes for education leaders. It provides understanding of the world of pupils will be moving into. More urgently, because it is not yet sufficiently recognised, it provides a framework for us to consider what is happening to teachers' careers now' - School Leadership The book will appeal to several different audiences, particularly those taking human resource modules in MBA and other postgraduate management courses, undergraduates taking special modules in university business schools or psychology departments, and all practising human resource managers, particularly those concerned with career management and (in the UK) those taking the IPD option on career management. The book is not primarily a do-it-yourself career manual, but nevertheless contains much that will assist people to manage their own careers better.

Istilah stunting atau kerdil atau pendek, mengacu pada gangguan pertumbuhan linear yang disebabkan oleh kekurangan gizi kronis. Menurut standar World Health Organization (WHO), seorang anak dinyatakan stunting jika tinggi badan atau panjang badan menurut umur (HAZ-score) setidaknya dua standar deviasi (SD) di bawah nilai median Standar Pertumbuhan Anak WHO. Stunting atau pertumbuhan terhambat, adalah hasil dari kekurangan gizi dalam waktu yang lama. Terdapat kontroversi di berbagai kalangan (para peneliti, donor, dan lembaga yang aktif dalam bidang gizi) mengenai terminologi stunting dan gangguan pertumbuhan linear. Perhatian global terhadap stunting didasarkan pada premis bahwa setiap intervensi yang bertujuan untuk meningkatkan pertumbuhan linier selanjutnya akan mengarah pada perbaikan dalam korelasi gangguan pertumbuhan linear dan stunting. Bukti dan pemahaman mekanisme saat ini tidak mendukung pemikiran kausal ini, dengan 2 pengecualian yaitu gangguan pertumbuhan linear adalah penyebab dari kelahiran yang sulit dan hasil kelahiran yang buruk. Gangguan

pertumbuhan linear dikaitkan dengan (tetapi tidak menyebabkan) keterlambatan perkembangan anak, berkurangnya pendapatan di masa dewasa, dan penyakit kronis. Buku ini dapat dijadikan sebagai referensi bagi para akademisi, mahasiswa (i), pemerhati masalah gizi dan kesehatan anak bangsa, dalam upaya mencegah kejadian stunting pada anak di masyarakat, karena dipahami secara saksama bahwa stunting hanya bisa dicegah namun sulit untuk dipulihkan bahkan mungkin tidak dapat dipulihkan. Oleh karena itu, prinsip pencegahan anak stunting penting untuk menjadi perhatian bersama bagi seluruh komponen anak bangsa untuk berinvestasi dalam menggapai masa depan anak bangsa yang gemilang sebagai generasi penerus bangsa. Stunting Mengancam Human Capital ini diterbitkan oleh Penerbit Deepublish dan tersedia juga dalam versi cetak.

Merging theory and practice into a comprehensive, highly-anticipated text Corporate Finance continues its legacy as one of the most popular financial textbooks, with well-established content from a diverse and highly respected author team. Unique in its features, this valuable text blends theory and practice with a direct, succinct style and commonsense presentation. Readers will be introduced to concepts in a situational framework, followed by a detailed discussion of techniques and tools. This latest edition includes new information on venture finance and debt structuring, and has been updated throughout with the most recent statistical tables. The companion website provides statistics, graphs, charts, articles, computer models, and classroom tools, and the free monthly newsletter keeps readers up to date on the latest happenings in the field. The authors have generously made themselves available for questions, promising an answer in seventy-two hours. Emphasizing how key concepts relate to real-world situations is what makes Corporate Finance a valuable reference with real relevance to the professional and student alike. Readers will gain insight into the methods and tools that shape the industry, allowing them to:

Analyze investments with regard to hurdle rates, cash flows, side

costs, and more Delve into the financing process and learn the tools and techniques of valuation Understand cash dividends and buybacks, spinoffs, and divestitures Explore the link between valuation and corporate finance As the global economy begins to recover, access to the most current information and statistics will be required. To remain relevant in the evolving financial environment, practitioners will need a deep understanding of the mechanisms at work. Corporate Finance provides the expert guidance and detailed explanations for those requiring a strong foundational knowledge, as well as more advanced corporate finance professionals. How Much Do You Believe That What Happens to You Is the Result of Your Own Actions—or Do Circumstances Beyond Your Control Largely Determine Your Fate? Locus of Control (LOC) is a phrase used by psychologists to describe a widely effective way of assessing an individual's potential for success—personal, social, and financial. LOC measures how much you believe what happens to you is the result of your own actions or, conversely, of forces and circumstances beyond your control. People who accept that they are largely in control of their lives tend to do better than those who feel that fate or external factors rule what they do, especially in novel and difficult situations. This book explains LOC research, until now mainly confined to academic circles, in terms easily understandable to the average person. The author, a clinical psychologist who has spent nearly five decades investigating and writing about LOC, helps the reader to explore his or her own locus of control and what those orientations might mean for how life is lived. He discusses the extensively documented relationship between LOC and academic achievement, personal and social adjustment, health, and financial success. Dr. Nowicki notes that there has been an increasing tendency among Americans to feel as though their lives are slipping out of their control, and he identifies ways to reverse this negative trend. He describes how the Locus of Control is learned and demonstrates ways in which it can be changed to yield higher levels

of achievement, success, personal satisfaction, and better interactions with others. The second edition of this bestselling textbook retains its unique learning-by-doing approach to econometrics. Rather than relying on complex theoretical discussions and complicated mathematics, this book explains econometrics from a practical point of view by walking the student through real-life examples, step by step. Damodar Gujarati's clear, concise, writing style guides students from model formulation, to estimation and hypothesis-testing, through to post-estimation diagnostics. The basic statistics needed to follow the book are covered in an appendix, making the book a flexible and self-contained learning resource. The textbook is ideal for undergraduate students in economics, business, marketing, finance, operations research and related disciplines. It is also intended for students in MBA programs across the social sciences, and for researchers in business, government and research organizations who require econometrics. New to this Edition: - Two brand new chapters on Quantile Regression Modeling and Multivariate Regression Models. - Two further additional chapters on hierarchical linear regression models and bootstrapping are available on the book's website - New extended examples accompanied by real-life data - New student exercises at the end of each chapter This book brings together leading scholars in the field of creativity to provide an overview and examination of the work of Teresa Amabile, a pioneer of research on organizational creativity. The authors explore Dr. Amabile's contributions to the modern study of creativity in organizations and her influence on current research. Further, they also reflect on how her work might be used to advance future research, particularly in the areas of componential theory and its extension as well as the consensual assessment technique. The contributors include both eminent and emerging scholars and their diverse backgrounds can be seen to reflect the breadth of the impact of Teresa Amabile's work across the areas of the social psychology of creativity,

creativity measurement, and application of this knowledge to understanding creativity and innovation in the workplace. This book will provide an invaluable resource to students and scholars of social psychology, creativity studies, industrial and organizational psychology, business and management. This comprehensive Handbook is aimed at both academic researchers and practitioners in the field of research. The book's 8 chapters, provide in-depth coverage of research methods based on the revised syllabus of various universities especially considering the students of under graduate, post graduate and doctorate level. This book is a product of extensive literature survey made by the authors. The authors have made sincere efforts to write the book in simple language. The book comprises all the aspects according to new syllabus of PCI and APJ Abdul Kalam Technical University, Lucknow. Though this book is intended for the use of pharmacy students of any level yet it can also be useful to students of applied fields and medical students. The book deals with interdisciplinary fields such as finding research problems, writing research proposals, obtaining funds for research, selecting research designs, searching the literature and review, collection of data and analysis, preparation of thesis, writing research papers for journals, citation and listing of references, preparation of visual materials, oral and poster presentation in conferences, minutes of meetings, and ethical issues in research. At the end of every chapter and book some questions related to chapter have been mentioned for the support of students to understand the subject. Valuable suggestions for the improvement of this book are most welcome. Presents the international exchange of scientific information. This series represents a range of geographic and subject matter interests in economics, and includes books from various areas of macroeconomics and microeconomics. It has been observed that the studies of quality are pursued in various disciplines like economics, quality management, and marketing science, and are seen isolated. The treatments imparted to these studies are also

different and has the backdrop of discipline in which the work has been pursued. The nature of isolation is equally seen when quality uncertainty and perceived quality were pursued separately without showing any inkling that these can be complimentary. Economist and Nobel Laureate, Akerlof (1970), wrote a seminal piece “The market for lemons: quality uncertainty and market mechanism”, where he described quality uncertainty due to information asymmetry. It refers to the fact that a party in a transaction may have more information than the other. This is information asymmetry. If the seller has more information than the buyer about the product quality, he/she may sell it, as if it is a high-quality product. In reality, it could be a low-quality product. The buyer does not have the information regarding the quality of the offered product. The market condition that led to this transaction is quality uncertainty due to information asymmetry. Context is increasingly recognised as a critical explanatory variable in accounting for commonalities and differences in human resource management. Giving expression to it in research models holds the prospect of enhancing theory development, deepening our appreciation of embedded practices in diverse territories, and opening up new lines of enquiry. However, contextualisation presents a significant research challenge and increasingly, international academic research networks that bring together scholars from different countries in the co-production of knowledge represent a key approach to rising to this challenge. This volume documents aspects of the development of one such network, namely the Cranet Network on International Human Resource Management, and presents a series of recent contributions from the network. The chapters highlight, inter alia, the limits to convergence in human resource management as a result of contextual determinism, the role of institutional actors, markets, and work regulation in accounting for variations in practices, the contextual specificities and dynamics at play in transition economies, along with key methodological challenges that arise when seeking to build

cumulative comparative knowledge via network collaborations of this nature. The chapters in this book were originally published as a special issue of *International Studies of Management & Organization*. An introduction to foundations and applications for quantitatively oriented graduate social-science students and individual researchers. This is the first book that explicitly focuses on the relationships between various types of friendship experiences and happiness. It addresses historical, theoretical, and measurement issues in the study of friendship and happiness (e.g., why friends are important for happiness). In order to achieve a balanced evaluation of this area as a whole, many chapters in the book conclude with a critical appraisal of what is known about the role of friendship in happiness, and provide important directions for future research. Experts from different parts of the world provide in-depth, authoritative reviews on the association between different types of friendship experiences (e.g., friendship quantity, quality) and happiness in different age groups and cultures. An ideal resource for researchers and students of positive psychology, this rich, clear, and up-to-date book serves as an important reference for academicians in related fields of psychology such as cross-cultural, developmental and social. This authoritative volume reviews the breadth of current scientific knowledge on subjective well-being (SWB): its definition, causes and consequences, measurement, and practical applications that may help people become happier. Leading experts explore the connections between SWB and a range of intrapersonal and interpersonal phenomena, including personality, health, relationship satisfaction, wealth, cognitive processes, emotion regulation, religion, family life, school and work experiences, and culture. Interventions and practices that enhance SWB are examined, with attention to both their benefits and limitations. The concluding chapter from Ed Diener dispels common myths in the field and presents a thoughtful agenda for future research. Pembahasan dalam buku ini dimulai dengan membahas perlunya metodologi penelitian

kriminologi, yang bertujuan untuk menunjukkan kekhasan ciri objek penelitian kriminologi yang khas yang tidak selalu sama dengan gejala sosial yang lain. Bab-bab berikutnya membahas tentang dominasi, kelemahan dan kelebihan statistik kriminal yang merupakan data utama dalam analisis kriminalitas. Kemudian berbagai tema yang merupakan objek penelitian kriminologi dibahas dengan memberikan contoh penelitian-penelitian yang baik yang dapat dijadikan sebagai inspirasi ketika melakukan penelitian. Tema-tema yang dibahas tersebut meliputi survei korban kejahatan, survei pengakuan diri, pengukuran keseriusan kejahatan, pengukuran penggentarjeraan, pengukuran residivisme, penelitian eksperimental, studi peramalan, dan penelitian-penelitian kualitatif yang meliputi penelitian kasus individual, kasus berganda, sub-kebudayaan maupun tingkah laku kolektif. Persembahan penerbit Kencana (PrenadaMedia) For Learning Theory/Cognition and Instruction, Advanced Educational Psychology, and Introductory Educational Psychology courses. An essential resource for understanding the main principles, concepts, and research findings of key learning theories -especially as they relate to education-this proven text blends theory, research, and applications throughout, providing its readers with a coherent and unified perspective on learning in educational settings. Conducting business across national borders is nothing new; the Knights Templar were banking internationally as long ago as 1135. But modern globalization processes raise different challenges, and as the world becomes smaller and labour movements more common, an international understanding of human resource management is essential. The second edition of International HRM provides a fully updated and revised analysis of this important area. Its innovative, multi-disciplinary approach allows a holistic picture to emerge in which key issues are assessed from organizational, individual and societal perspectives. The collection is divided into three parts: the contemporary internationalization context the management of international employees strategic issues facing international HR managers. Supported by new research, and including work from eminent writers in the field, this book discusses issues as diverse as the relative absence of women in international work, the ethical merits of localization, and the context faced by organizations like the United Nations. It is a valuable tool for all students, researchers and practitioners working in international business and human resource management. For almost a century, educational theory and practice have been influenced by the view of behavioural psychologists that learning is synonymous with behaviour change. In this book, the authors argue for the practical importance of an

alternate view, that learning is synonymous with a change in the meaning of experience. They develop their theory of the conceptual nature of knowledge and describe classroom-tested strategies for helping students to construct new and more powerful meanings and to integrate thinking, feeling, and acting. In their research, they have found consistently that standard educational practices that do not lead learners to grasp the meaning of tasks usually fail to give them confidence in their abilities. It is necessary to understand why and how new information is related to what one already knows. All those concerned with the improvement of education will find something of interest in *Learning How to Learn*. What factors enable individuals to overcome adverse childhoods and move on to rewarding lives in adulthood? Drawing on data collected from two of Britain's richest research resources for the study of human development, the 1958 National Child Development Study and the 1970 British Cohort Study, this 2006 book investigates the phenomenon of 'resilience' - the ability to adjust positively to adverse conditions. Comparing the experiences of over 30,000 individuals born twelve years apart, Schoon examines the transition from childhood into adulthood and the assumption of work and family related roles among individuals born in 1958 and 1970 respectively. The study focuses on academic attainment among high and low risk individuals, but also considers behavioural adjustment, health and psychological well-being, as well as the stability of adjustment patterns in times of social change. This is a major work of reference and synthesis, that makes an important contribution to the study of lifelong development. The foremost resource in its field, these four volumes contain state-of-the-art thinking on the most significant issues in industrial and organizational psychology by leading scholars and practitioners. Volume 1 forms the groundwork for the Handbook, covering fundamental areas at both the individual and organizational level. Section one examines the major theoretical contributions to the field and the role of theory itself, while section

two explores research methods and measurement strategies. In a world in which we are constantly surrounded by data, figures, and statistics, it is imperative to understand and to be able to use quantitative methods. Statistical models and methods are among the most important tools in economic analysis, decision-making and business planning. This textbook, “Exploratory Data Analysis in Business and Economics”, aims to familiarise students of economics and business as well as practitioners in firms with the basic principles, techniques, and applications of descriptive statistics and data analysis. Drawing on practical examples from business settings, it demonstrates the basic descriptive methods of univariate and bivariate analysis. The textbook covers a range of subject matter, from data collection and scaling to the presentation and univariate analysis of quantitative data, and also includes analytic procedures for assessing bivariate relationships. It does not confine itself to presenting descriptive statistics, but also addresses the use of computer programmes such as Excel, SPSS, and STATA, thus treating all of the topics typically covered in a university course on descriptive statistics. The German edition of this textbook is one of the “bestsellers” on the German market for literature in statistics.
