Many students, ranging from native English speakers to recent immigrants, need help in understanding and using the language of school. Language is the lifeblood of learning in all content areas, and it plays a major role in academic achievement. *Building Academic Language* explains the functions and features of academic language that every teacher (language arts, history, math, & science teachers, etc.) should know for supporting academic reading, writing, and discussion. The book includes research-based instructional and assessment activities that content teachers can use to build students' abilities to understand and describe the many abstract concepts, higher-order thinking skills, and complex relationships in a discipline. The book emphasizes an approach that builds from students' existing ways of learning and communicating, scaffolding them to think and talk as content area experts think and talk about math, science, history, and language arts. Major topics and themes include: What is academic language and how does it differ by content area? How can language-building activities (discussions, small groups, etc.) support content understanding? How can we build language abilities for content reading and writing - and vice versa? How can we build on students' diverse ways of understanding, learning, and communicating about the world? How can we more effectively model and scaffold academic language in our teaching and assessment? In the county schools, students are assessed every nine weeks based on a writing prompt using a rubric supplied by the county, but the students are often taught using Writer's Workshop. This action research attempted to determine if Writer's Workshop and the use of writing prompts have different effects on first graders' writing ability and attitudes. Eighteen students (N=18) in a first grade class were randomly split into two groups, and during a 5-week period each group was taught writing in a

different method. One group received instruction on writing a persuasive paper using a prompt, and another received instruction on writing a persuasive paper with a free-choice of topic. The students were then assessed on their writing ability and attitude towards writing at the end of instruction. A series of t-tests and item analysis was conducted to compare writing ability and attitude between the two groups. The results showed that both Group A (prompted) and Group B (free-choice) experienced a decline in overall attitude about writing over the course of the study. Group A (prompted), however, experienced more of a decline than Group B (free-choice). It appears that students get slightly more enjoyment out of choosing their topic than being told what to write. The overall scores on the final persuasive writing showed that students taught using a prompt scored better than those with free-choice (11.56 greater than 9.78). The only subcategory where Group B (free-choice) scored higher than Group A (prompted) was in conventions. (Ideas: 4.89 greater than 3.56; Organization 2.56 greater than 2.11; Style 2.22 greater than 2.00; Conventions: 1.89 less than 2.11). It also shows that students who write better enjoy the writing process more. Overall, the scores on the Writing Assessment were better from those students receiving a prompt. When students are given the freedom to write what they choose, they have a more positive attitude towards writing. This study indicates that free choice writing and prompted writing both have a place in the classroom. In order to teach a specific type of writing (i.e. persuasive, narrative, informational) students need prompts and clear instructions. However, if we are to foster a life-long love of writing, classroom teachers need to set aside time for students to write what they want to write about and share with others. Elementary Writing Attitude Survey and Persuasive Writing Rubric--Grade 1 are appended. (Contains 9 tables and 1 figure.). Educational title

It is the only inclusion textbook available with a consistent, integrated emphasis on Universal Design for Learning (UDL)—an important, contemporary educational philosophy focused on using strategies and tools to help ALL students by

accommodating their differences. Aligned with InTASC and CEC standards, this text also provides foundational information about children with disabilities who are included in today's classrooms, and the most effective strategies for teaching them alongside their typically developing peers. Featuring new material on Common Core State Standards, case studies, and sound research-based teaching and learning strategies, this hands-on text offers pre-service and in-service teachers a practical, flexible framework for effective instruction, classroom management, assessment, and collaboration in today's diverse classrooms. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. The performance tasks in this book are linked directly to instructional strategies and include holistic rubrics, analytic rubrics, and assessment lists. They can be photocopied and distributed to your students. Included in this series are 98 performance tasks, 196 assessment lists, 18 holistic rubrics, 30 analytic rubrics, and 88 graphic organizers. The authors of Understanding by Design share a compelling strategy for creating schools that truly fulfill the central mission of education: to help students become "thoughtful, productive, and accomplished at worthy tasks." Reading and writing are skills which can be easily practiced in an English as a Foreign Language (EFL) environment, and are particularly important for academic improvement and life-long learning. The book includes an overview of theoretical and practical issues of methods of teaching EFL reading and writing, as well as some research on related topics in Georgia. It deals with such issues as theories of reading and writing, reading and writing activities, motivation, and assessment. It focuses on EFL, as, in Georgia, there is no English-language environment apart from the classroom where students can develop their communicative skills. The contributors to this volume work at

the International Black Sea University, where tuition is mostly conducted in English, and, correspondingly, teaching English is one of the main research priorities. The Middle School Writing Toolkit addresses the 5 major writing genres that middle-school students are expected to master - reports, persuasive essays, how-to (procedural) essays, narratives, and literary responses - and provides 57 mini-lessons and more than 200 workstation tasks to start English teachers well on their way to creating a successful writing program in the classroom. A practical guide to more effective assessment for improved student learning Learn how to be more consistent in judging student performance, and help your students become more effective at assessing their own learning This book o This updated edition provides strategies for deepening students' understanding of math concepts, involving students in standards-based rubric development, and using rubric data to improve instruction. This book is a step-by-step guide to harnessing the power to persuade in a variety of forms of writing. • A wealth of original documents provides examples of solid persuasive writing, from essays, articles, sermons, advertising, and other sources • Includes an annotated bibliography of print and electronic resources Replete with strategies, examples, and reproducibles, this guide is invaluable for any teacher who wants to boost student achievement in writing for any subject or grade level! The step-by-step instructions, scheduling guidelines, rubric assessments, & reproducible forms in this guide are the result of years of research, planning & fine-tuning in the classroom. Developed by educators in Milwaukee's public schools and successfully used with over 15,000 students, this book will show you how to: - engage your students in high quality work - reveal information about your students which cannot be seen through standardized tests - help students become responsible for their own academic growth. The tasks

and rubrics in this book will help you discover the strengths and learning needs of your students. With concrete, detailed examples from Kindergarten through 5th grade, this book demonstrates how to implement assessment portfolios in your classroom. Part I provides concrete details about how to organize, implement, and maintain assessment portfolios throughout the school year. In Part II are assessments in reading, writing, and math - featuring class tested scoring rubrics and samples of student work. Also included are learning projects, rich classroom activities requiring high quality intellectual work. Part III contains student handouts and scoring sheets, ready for you to distribute and use with the students in your class. Activities in this book have been divided into three categories: letters, editorials, and reviews. Incorporated throughout the book are standards for assessment. Written specifically for non-language arts teachers, this resource focuses on using writing as an instructional tool to deepen and expand student understanding in the content areas. Teaching approach is an important inquiry in second language (L2) writing scholarship. This study proposes that a genre-informed writing programme could be more effective than the current curriculum-material teaching programme in improving students' writing of English as a foreign language (EFL) in China. To ensure the inference validity from the outcomes of the genre teaching, three interrelated studies were conducted. Study 1 was to validate whether the genre-specific rubric, Assessment Tools for Teaching and Learning (asTTle) persuasive writing rubric, could be used to assess Chinese students' writing in university. The eight Chinese teachers marked 10 official CET4 essays with both asTTle and CET4 rubrics, and the results showed that asTTle levels (2-6) could cover the different ranges of Chinese students' writing, although more training was needed to obtain high marking

reliability. Study 2 developed two contrastive teaching programmes by reviewing the literature. The key difference between the two programmes was the explicitness of the genre knowledge. In the curriculum programme, the genre knowledge was partially included, and the explanations of the genre knowledge was implicit although the teaching was followed the L1 genre process. In the genre-informed programme, five genre dimensions were included, the contrastive knowledge of English and Chinese writing tradition, and annotated writing samples were applied to enhance the explicitness. A panel of experts validated that the two plans were distinct from each other and abided by their respective principles. Study 3 implemented a 13-week intervention with a counterbalanced design in which the second group serves as the control for the first group in Phase 1 treatment, and vice versa in Phase 2. The results showed that the difference between the gains under two teaching programmes was large with ( $d=.86$ ,  $d=.89$ ) for genre teaching in two phases. The findings indicated that the genre-informed writing programme was more effective than the current teaching practice. With the alignment of the teaching plan, intervention and measurement of genre dimensions, the validity of inference from the intervention was justified. The significance of the study lies in that the explicitness of the genre knowledge is adapted to the local context instead of following the practice in the L1 context. The study will provide evidence for improving writing pedagogy in the EFL context. These fun writing exercises will improve students' understanding of the writing process along with their language arts skills. This book takes a developmental perspective at the use of scoring rubrics to assess student work. Citing developmental characteristics of each age, the author presents examples and adaptations of assessment rubrics on a variety of subjects for teachers from kindergarten through adult/college. After a presentation of foundation information on rubrics, separate chapters are devoted to each grade level from primary through adult. Written so that each chapter can be addressed independently, the book provides additional chapters devoted to assessing technological topics and using rubrics with students with special needs. The final chapters provide practical information to help teachers to create their own rubrics and to covert rubric scores to letter grades. An updated annotated listing of recommended rubric websites is included. Kay Burke provides a detailed six-step walk-through for creating successful student learning tasks and assessment rubrics linked to state standards and NCLB. A CD-ROM with templates is included. The Common Core State Standards (CCSS) identify three essential writing genres: narrative, persuasive, and informative. This highly practical guide offers a systematic approach to instruction in each genre, including ready-to-use lesson plans for grades 3-5. Grounded in**

research on strategy instruction and self-regulated learning, the book shows how to teach students explicit strategies for planning, drafting, evaluating, revising, editing, and publishing their writing. Traditional methods of supervision and evaluation focus on teachers' inputs: their lesson plans, instruction, and classroom management practices. But what matters most is the outcome they achieve: learning. This book introduces Performance-Based Supervision and Evaluation (PBSE), a data-driven and teacher-directed approach proven to build educators' analytical and instructional capacity to address the

learning needs of their students. It's a move away from disconnected annual goals and outside-in improvement initiatives, and toward the full integration of teacher evaluation, strategic professional development, and school improvement planning. *Supervision for Learning* is an important resource for school leaders looking to

- \* Honor the judgment of teachers while targeting student performance in areas of essential knowledge and skills articulated in standards;
- \* Empower all teachers to use performance data as the basis for instructional decisions and monitor the effectiveness of these decisions through action research;
- \* Develop meaningful collaborative relationships with and among teachers; and
- \* Acquire authentic evidence of teacher and student growth.

Authors James M. Aseltine, Judith O. Faryniarz, and Anthony J. Rigazio-DiGilio explain the best-practice foundations of their approach and provide guidelines for its implementation. Sample artifacts and illustrative vignettes bring the PBSE process to life, clarifying the supervisor's role, the teachers' responsibilities, and the students' gains. You'll also find a planning and monitoring tool that maps milestones within the development and evaluation cycle, along with strategies for reconciling this approach with district reporting requirements and budget realities. Properly crafted and individually tailored feedback on student work boosts student achievement across subjects and grades. In this updated and expanded second edition of her best-selling book, Susan M. Brookhart offers enhanced guidance and three lenses for considering the effectiveness of feedback: (1) does it conform to the research, (2) does it offer an episode of learning for the student and teacher, and (3) does the student use the feedback to extend learning? In this comprehensive guide for teachers at all levels, you will find information on every aspect of feedback, including Strategies to uplift and encourage students to persevere in their work.

**How to formulate and deliver feedback that both assesses learning and extends instruction. When and how to use oral, written, and visual as well as individual, group, or whole-class feedback. A concise and updated overview of the research findings on feedback and how they apply to today's classrooms. In addition, the book is replete with examples of good and bad feedback as well as rubrics that you can use to construct feedback tailored to different learners, including successful students, struggling students, and English language learners. The vast majority of students will respond positively to feedback that shows you care about them and their learning. Whether you teach young students or teens, this book is an invaluable resource for guaranteeing that the feedback you give students is engaging, informative, and, above all, effective. A step-by-step approach to teaching persuasive writing in grades 4-6. Offers practical tips for integrating test preparation into teaching and includes classroom examples, scenarios, checklists, dialogues, and student work samples to illustrate multiple assessment formats. Focusing on narrative, expository, and persuasive writing and poetry, this guide provides strategies and tools to facilitate writing development for English learners in Grades 2-8. Breathe new life into science learning with this powerful guidebook that shows how to create more thoughtful curriculum and differentiate lessons to benefit all students. Differentiated instruction is a nice idea, but what happens when it comes to assessing and grading students? How can you capture student progress, growth, and soft skill development and still provide an equitable grading environment? An internationally recognized expert on grading practices, author Rick Wormeli revisits these questions in this thoroughly updated second edition of *Fair Isn't Always Equal: Assessment and Grading in the Differentiated Classroom*. Wormeli reflects on current**

grading and assessment practices and how they can exist with high-stakes, accountable classrooms. Important and sometimes controversial issues are tackled constructively in this book, incorporating modern pedagogy and addressing the challenges of teaching diverse groups of students across all learning levels. Middle- and high-school educators will easily recognize gray areas of grading and how important it is to have a shared school vision. In this second edition, new sections address sports eligibility, honor roll, descriptive feedback techniques, and gifted/talented students. Previous chapters on test questions, redos/retakes, grading scales, and grading effort and behavior have been revised extensively. This important book clearly explains the principles behind best grading practices so that you're ready for all grading questions or scenarios that you may encounter in your classrooms and schools. Teach students to think and express themselves scientifically through step-by-step strategies that develop concise writing and discussion skills. With *Think It, Show It: Science*, students in grades 3-8 will learn through guided instruction how to express themselves scientifically, represent their conjectures and results in written form, and gain essential critical-thinking skills.
