Scrupulosity (al-Wara ') in Early Islam Sep 24 2020 This book aims to discuss religious scrupulousness (al-wara') - an important phenomenon in Islamic spirituality and tradition in the 3rd/9th century. Through the study of hadith compilations devoted to piety the author tries not only to define the concept of scrupulousness itself, but also to present the world of Muslim scholars who composed these collections of traditions. An important aspect of the book will be a discussion of a possible social impact of religious scrupulousness as well as of its cultural context. Thus, another examined subject will be the link of religious scrupulousness with the Islamic eschatology, as well as with the visions of the Hereafter. On the whole, religious scrupulousness will be analysed as one of the portents of changes occurring in the Islamic society and civilisation in the 3rd/9th century, when new forms of piety are accompanied by apocalyptic fears and anxieties.

The Legend of Worthington Industries Jun 21 2020 In 1955, John H. McConnell, the son of a steelworker, borrowed \$600 against his 1952

Oldsmobile to finance the Worthington Steel Company. McConnell, an experienced steel broker, perceived an opportunity: large mills were shifting processing capabilities away from smaller customers. Today, Worthington has earned a position as one of the nation's largest steel processors by serving customers with specialized needs, and in the 1980s, built a large custom plastic capability. The company produces metal framing for construction, body panels for cars, railcar castings, and pre-formed dashboard assemblies for major automakers. Jeffrey L. Rodengen captures the story of free enterprise and personal drive in this well-illustrated volume.

Cerner Mar 19 2020 For over 26 years, Cerner has been a leading healthcare information technology supplier, developing groundbreaking solutions to help clinicians organize and access medical data. Cerner has not only improved the overall operational efficiency of healthcare, but ensured a safer environment for patients around the world. More Americans die each year as a result of medical error than from motor vehicle accidents, breast cancer, and AIDS. Cerner has endeavored to reduce these tragedies by automating and connecting fragmented medical solutions. When the company's founders? Neal Patterson, Cliff Illig, and Paul Gorup' first came together in 1979 to launch Cerner, information technology (IT) was still a new concept within the healthcare industry. Most facilities still relied on paper medical charts and handwritten files to keep track of patient records. Through its solutions, Cerner has developed a more cohesive infrastructure, in which caregivers have straightforward and effective access to computerized clinical systems, patient records, and billing processes. Cerner solutions extend across the full

spectrum of medicine, from radiology to pharmaceutical care. By investing in long-term growth, Cerner has managed to remain on the cusp of the exploding healthcare IT industry. Cerner continues to broaden its market presence and further specialize its solutions portfolio. Working in conjunction with the best hospitals and clinics in the United States and abroad, the company also provides assistance to international and statewide initiatives in its effort to integrate medical data. Cerner has grown to generate more than \$1 billion a year, and a significant aspect of this success lies in the loyalty of its nearly 7,000 associates. Cerner: From Vision to Value is a tribute to the diligence of these associates in their quest to deliver superior medical care to patients, while controlling the costs of healthcare services as they confidently look towards the future.

Bicycles Locked to Poles Jul 03

2021 This mournful but pleasing collection features many of the best photographs of bicycles locked to poles ever taken. Shot using an old-fashioned 35mm Nikon, and in many cases after waiting days for alternate-side-of-the-street

parking regulations to take effect, the photos here follow in the tradition of John James Audubon, Bernd and Hilla Becher, the Peterson Field Guides, and The Observer's Book of Steam Locomotives. *Bicycles Locked to Poles* began in early 2001, when a magenta arrow - spray painted on the sidewalk by a representative of the electrical utility - pointed directly to the sadly bent, Daliesque wheel of a bicycle on the photographer's street. Glassie passed by every day for months, until one day it was gone. He has been documenting bicycles locked to poles, bent, broken and otherwise, in and around his East Village neighborhood of New York ever since. This volume presents a careful selection from Glassie's collection of over a thousand color photographs, as well as a graphical guide to present, damaged and missing bicycle parts, and a quote from Marvin Minsky's *The Society of Mind*. *Bicycles Locked to Poles* is a rare treasury for anyone interested in bikes, poles, locks, or the forgotten artifacts of the urban landscape. Arboretum Aug 04 2021 For over thirty years, besides making music, David Byrne has focused his unique genius upon forms as diverse as the archaeology of music as we know it, architectural photography and the uses of PowerPoint. Now he presents his most personal work to date, a collection of drawings exploring the form of the tree diagram. *Arboretum* is an eclectic blend of science, automatic writing, self-analysis

and satire. A journey through irrational logic - the application of scientific rigour and form to irrational premises, proceeding from careful nonsense to unexpected sense. The tree diagram is a form that might reveal more about yourself than you dreamed possible.

Prime Time Soap Operas on Indian Television Dec 20

2022 This book examines the phenomenon of prime time soap operas on Indian television. An anthropological insight into social issues and practices of contemporary India through the television, this volume analyzes the production of soaps within India's cultural fabric. It deconstructs themes and issues surrounding the "everyday" and the "middle class" through the fiction of the "popular". In its second edition, this still remains the only book to examine prime time soap operas on Indian television. Without in any way changing the central arguments of the first edition, it adds an essential introductory chapter tracking the tectonic shifts in the Indian "mediascape" over the past decade - including how the explosion of regional language channels and an era of multiple screens have changed soap viewing forever. Meticulously researched and persuasively argued, the book traces how prime time soaps in India still grab the maximum eyeballs and remain the biggest earners for TV channels. The book will be of interest to students of anthropology and sociology, media and cultural studies, visual culture studies, gender and family studies, and also Asian studies in general. It is also an important resource for media producers, both in content production and television channels, as well as for the general reader.

The History of American Standard Jul 23 2020 The

history of American Standard flows from the stories of two manufacturing giants indispensable to the world's health and welfare. In 1929, the American Radiator Company and Standard Sanitary Corporation, merged to form American Standard. Today, with 44,000 employees, American Standard has become a multinational manufacturer and distributor of plumbing, air conditioning and automotive products. Through innovations and acquisitions, American Standard, headquartered in Piscataway, New Jersey, continues to set industry standards that improve the way we live.

Ethnic Identity and Minority Protection Dec 28 2020 In

Ethnic Identity and Minority Protection: Designation, Discrimination, and Brutalization, Thomas W. Simon examines a new framework for considering ethnic conflicts. In contrast to the more traditional theories of justice, Simon's theory of injustice shifts focus away from group identity toward group harms, effectively making many problems, such as how to define minorities in international law, dramatically more manageable. Simon argues that instead of promoting legislative devices like proportional representation for minorities, it is more fruitful to seek adjudicative solutions to racial and ethnic-related conflicts. For example, resources could be shifted to quasi-judicial human-rights treaty bodies that have adopted an injustice approach. This injustice

approach provides the foundation for Kosovo's case for remedial secession, and helps to sort out the competing entitlement claims of Malays in different countries. Indeed, the priority of Thomas W. Simon's *Ethnic Identity and Minority Protection* is to ensure the tales of designation and discrimination told at the beginning of the work do not become the stories of brutalization told at the end. In short, the challenge tackled in this text is to assure that reason reigns over hate.

Telecommunications in Africa May 13 2022

Telecommunications is becoming an essential infrastructure in the global economy. The electronic flow of information around the world favors those nations that have invested in the technology to participate in this global commerce. Bringing together experts on Africa, this book provides a comprehensive view of what individual African countries are doing to build a telecommunications capability. Special attention is paid to telecommunications as a link in the chain of the regional development process. The editor, Eli Noam, is an internationally known authority on telecommunications, and this book is the latest in a group of similar works that survey telecommunications in major regions of the world. This work will appeal to students and professors of telecommunications, international telecommunications companies, and country governments in Africa.

Her Stories May 01 2021 Since the debut of *These Are My Children* in 1949, the daytime television soap opera has been foundational to the history of the medium as an economic, creative, technological, social, and cultural institution. In *Her Stories*, Elana Levine draws on archival research and her experience as a longtime soap fan to provide an in-depth history of the daytime television soap opera as a uniquely gendered cultural form and a central force in the economic and social influence of network television. Closely observing the production, promotion, reception, and narrative strategies of the soaps, Levine examines two intersecting developments: the role soap operas have played in shaping cultural understandings of gender and the rise and fall of broadcast network television as a culture industry. In so doing, she foregrounds how soap operas have revealed changing conceptions of gender and femininity as imagined by and reflected on the television screen.

Preventing Corporate

Accidents Nov 26 2020 The passing of the Corporate Manslaughter and Corporate Homicide Bill in the UK and increasing public and investor pressure for good Corporate Governance and Corporate Social Responsibility, means organizations now, more than ever, need to ensure they do all they can to prevent major accidents. However, past experience shows that just implementing safety management systems is not enough and this book makes the case for a more holistic and ethical approach to improving corporate systems as a whole. Preventing Corporate Accidents shows how major accidents can result from human error and defects in corporate systems. The book describes accident prevention strategies, from safety culture, safety management systems, foresight and planning to safety regulations, corporate ethics, corporate social responsibility and the learning organization. Barry Whittingham illustrates with international case studies from various industries how and why these defences have failed in the past, and more

importantly, how to strengthen corporate systems to prevent future major accidents. The case studies include: The loss of the space shuttle Columbia Infant heart surgery at Bristol Royal Infirmary The Davis-Besse nuclear power plant incident The fire and explosion at the Conoco-Phillips Humber oil refinery Herald of Free Enterprise and Southall rail accident manslaughter prosecutions This book is essential reading for all those with a professional interest in health and safety management, the control of major risk and accident prevention, in particular for directors, senior managers and health & safety professionals in high-hazard industries and public operations, such as nuclear, chemicals, construction, oil and gas, energy, manufacturing and transportation. Barry Whittingham has worked as a senior manager, design engineer and consultant for the chemical, nuclear, offshore, oil and gas, railway and aviation sectors. He developed a career as a safety consultant specializing in the human factors aspects of accident causation. Barry is a Fellow of the Safety and Reliability Society.

A group of art students gather at your cousin's birthday party where the guest of honour is murdered. One of them is the killer, and everyone is a suspect—including you. You ask everyone in the group to write letters to you, talking openly about what happened, and sharing artworks they've done in the period of time before, during, and after the party. People say artists show their soul through their art ... now it's up to you to discover the darkness inside someone you trusted. *A Bloody Birthday* is a story told through letters, objects, and artworks. The reader is a character in the story, invited to guess the identity of the killer through the clues and insights waiting to be unravelled.

A Midsummer Lark Jun 14 2022

India Feb 27 2021 The most pertinent social, economic and political issues confronting India today center around the question of modernity. In this book, Javeed Alam seeks to untangle the complex, and often contradictory, constructions of modernity. He suggests new ways of approaching modernity which are liberatory, rather than oppressive, and may help in the struggle for a more equitable and just society both within the country and in the wider world.
