Why does the other lane always move faster? Why do New Yorkers jaywalk (and nobody does in Copenhagen)? And why should you never drive with any beer-drinking, divorced doctors named Fred? Driving is about far more than getting from A to B. As Tom Vanderbilt's brilliant, curiosity-filled book shows, it's actually the key to deciphering human nature and ... well, pretty much everything. From the etiquette of horn-honking to bumper stickers you should avoid, from gridlock in ancient Rome to why getting rid of road signs actually reduces accidents, Traffic will change the way you see

yourself, and other people (and not just through your windscreen).

Attacking Manuals 1 & 2 comprise the first thorough examination of the nature of dynamics in chess, and the principles explained in this book are relevant to every chess game played. In lively no-nonsense language, Aagaard explains how the best players in the world attack. The rules of attack (the exploitation of a dynamic advantage) are explained in an accessible and entertaining style. This groundbreaking work is well balanced between easily understandable examples, exercises and deep analysis. Volume 2 covers what to do once the attack is up and running, and deals with weak kings, intuitive sacrifices, opposite castling, king hunts, and enduring initiative. Attacking Manuals 1 & 2 were chosen as the English Chess Federation's Book of the Year 2010. Media Flight Plan was developed in response to the need for affordable media planning simulations in the university classroom. Professional level media planning software ranges in price from hundreds to thousands of dollars. Media Flight Plan, including both the textbook and the online simulation, sells at or below the average price of a used textbook. MFP provides university students' access to not only realistic simulations of planning software, but also includes access to professional syndicated data like MRI, SRDS, Nielsen data, (all by permission) and other syndicated sources that only large corporations and agencies can afford. Besides the online software simulation, the text includes eight chapters that cover basics like basic math models involved in media buying/planning, and exercises that cover calculation of audience ratings, media share, reach and frequency, and gross rating points. Case studies are included for actual Fortune 500 clients. All cases require students to interpret and apply professional syndicated data and employ the basic methods for writing marketing driven media plans. Both authors, Dennis Martin and Dale Coons, have professional ad agency experience. Coons is executive vice president in a major agency where he directs research, media planning and client development. He is among the most sought-after experts in the field of advertising research. Martin worked on national brands as a copywriter and creative director and co-authored Strategic Advertising Campaigns, a national best-seller for Advertising Age's publishing division. Earning his Ph.D. at University of Illinois, he achieved national and international recognition as a professor of marketing communications. For the first
